Is it so hard to fill me in?
```
          E         E/G#  A
```
And then I see the latest bulletin
```
          E                  A
```
You're alive with someone new.
```
            E         B         E
```
Comprendo. I just can't get next to you.

```
        E                  B
```
Do I ignore what's on that phone
```
        E      E/G#          A
```
And that every venue's a danger zone?
```
           E                A
```
'Cause I might as well slip on through.
```
           E         B          E              E7
```
Still baby I just can't get next to you.

I'll try to be a good sport

And in the morning not knowing where I've been.

I Just Can't Get Next To You

```
        E              B
As I've been graced by this fortune.
            E        E/G#   A
Straight from your arms, I am sent on this lone mission
            E                    A
Under skies that are so blue.
            E        B        E        E7
But baby, I just can't get next to you.
```

```
    A      E              D     B     E         E7
```

```
            A
You kept me hanging on the one act.
        E
I'm a man of great extremes.
            D                    B
And with each layer of happiness I'm puttin' on.
            C#m                  B        E
Deep down I know it ain't the same since you're gone.
```

```
            B
I'll be no fuss.
        E          E/G#       A
I'll accept what is left of the two of us.
        E        A
It is my fairest review
        E          B          C#m
Considering the crazy things I do.
            E          B        E        E7
Cause baby I just can't get next to you.
